Pack of 0.9, 3.6, 9 and 20 Lt

Bases

P0, W1, N2, Yellow and Cream, N

Fire Hazard Class
Non-flammable

Pot Life of Thinned Material
Overnight

Surface Preparation

For fresh/ new surfaces, ensure the surface is clean and dry and free from all loose particles, chalk, grease, fungus and algae. Sand the surface with Emery Paper No. 80 and wipe clean.

Apply the first coat of primer and allow it to dry for 6 – 8 hours.

Smoothen the surface by applying thin coats of putty to fill in all the dents. Allow the putty to dry overnight.

Sand the surface with Emery Paper No. 100 and wipe clean. Apply the second coat of primer and allow it to dry for 6 – 8 hours. Sand the surface with Emery Paper No. 220 and wipe clean.

For Previously Painted Surfaces: Strip all the old paint and remove all the loose particles before starting the above process of primer and putty application.

Directions for Application

Dilute the paint as per the recommended dilution ratio. Apply the first finishing coat and allow it to dry for at least 6 -8 hours. After the first coat dries, apply the second coat and allow it to dry overnight.

Cleaning Instructions

Use only toilet soap to clean stains

Use only a soft white cotton cloth for cleaning

While cleaning, wipe gently without using pressure

Attempt cleaning the surface only after one week of application

Points to Note

- ▶ Shake well before use and do not over dilute
- ▶ Strain the material through a fine sieve before use
- ▶ Keep the container tightly closed to prevent drying
- ▶ Use one coat of Bio – Wash for killing fungal growth
- ▶ Scrape off old paint thoroughly before painting starts
- ▶ Gyro shake well after tinting through CB Machine
- ▶ For deep shade apply one additional coat
- ▶ Do not apply paint on lime washed surfaces and damp wall
- ▶ In case of contact with eyes, wash immediately with water and seek medical help
